DiverSync AI Platform

AI-Powered Supplier Risk Intelligence

AI-powered platform that turns ESG data into actionable procurement insights that drive smarter, faster supplier decisions.

Presented by:

Althaf Shaik Shiva Srinivas Nitish Nair Angel Ramos José Segundo

The Compliance Nightmare

Traditional supplier evaluation is manual, fragmented, and fraught with risk.

Volume Overload

Thousands of supplier PDFs, audit reports, and certifications flood procurement teams daily.

Slow Evaluation

Manual reviews take weeks instead of minutes, delaying critical procurement decisions.

Hidden Risks

ESG gaps remain undetected until they cause reputational damage or compliance violations.

Why this platform helps?

From Chaos to Clarity

Our AI pipeline converts raw documents into risk scores in minutes, not weeks. Automated extraction and intelligent scoring eliminate manual bottlenecks while ensuring consistent, objective evaluations.

Ingest

Supplier Information

It is collected from source supplier which provides insights into the company's environmental practices

ESG Reports

Is published by suppliers and provide structured information about their environmental impact, sustainability goals, social initiatives, and government practices, which are essential for evaluating supplier sustainability performance

Extraction

Extract ESGD-related insights from supplier sustainability information to support automated risk scoring.

Environmental

Carbon emission reduction commitments

Water usage and water management practices.

Waste management and recycling initiatives.

Social

Labor standards and employee welfare initiatives

Governance

Transparency in sustainability reporting

Ethical and responsible business practices.

Diversity

Workforce diversity initiatives

Inclusion and equal opportunity commitments.

AI Data Processing

Technology Used

Natural Language Processing (NLP).

Large Language Model (LLM)

AI Document Analysis

Retrieval-Augmented Generation (RAG)

Text Mining Techniques

Key AI Tasks

Extract sustainability indicators from text.

Identify ESG-related commitments

Converts unstructured information into structured data.

Example Signals Extracted

Carbon reduction targets

Waste management initiatives

Workforce diversity programs

Social responsibility commitments

ESG Scoring Model

Evaluation Dimensions

Environmental Sustainability

Social responsability

Governance Transparency

Diversity & Inclusion Practices.

Scoring Approach

Weighted scoring model

Configurable scoring weights based on business priorities.

Aggregated supplier sustainability score

Output

Final supplier sustainability score

Category-wise evaluation

Conclusion & Future Scope

Future Capabilities

Real time supplier sustainability monitoring

Integration with procurement platforms

Predictive supplier risk analysis

Closing Statement

AI driven supplier sustainability evaluation enables organizations to build responsible transparent and resilient supply chain.

Beyond Benchmarking: Intelligent Recommendations

Our platform doesn't just identify risks—it provides the tools to address them proactively.

Automated Evidence Pack

Direct citations from source documents with page references, enabling rapid verification and audit readiness.

Intelligent Risk Flags

High/Medium/Low alerts with clear rationale, helping procurement teams prioritize remediation efforts effectively.

Corrective Action Plans

AI-generated improvement plans with specific steps, timelines, and expected outcomes for supplier remediation.

Ready to Transform Supplier Risk Management?

Schedule a Demo

See the platform in action with your organization's supplier data and evaluation criteria.

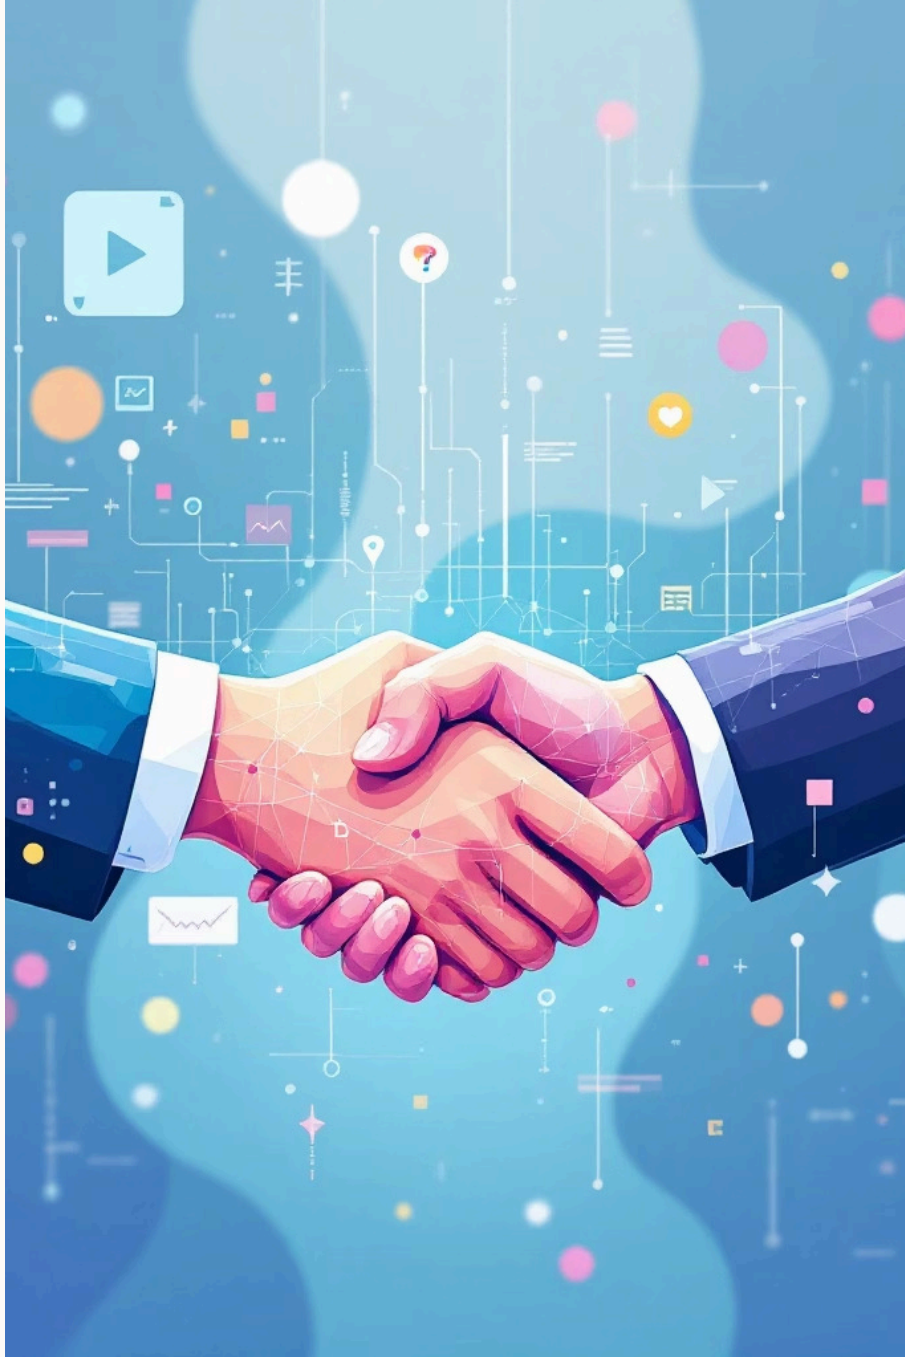
Get a Custom Quote

Receive pricing tailored to your supplier volume, evaluation complexity, and integration needs.

Explore Integration

Learn how our API connects with your existing procurement and ERP systems seamlessly.

Turn ESG data into competitive advantage. Start your journey to intelligent supplier risk management today.



Thank You
